SATELLITE-BASED GLANCE INTO TODAY, MONDAY 09 DECEMBER 2024

WEATHER REPORT & Forecast

Yesterday's moisture that drifted into the northern parts of the country (Matabeleland North, Harare Metropolitan, all Mashonaland provinces and the northern parts of Manicaland) led to isolated thundershowers. The highest rainfall amounts were recorded in Rushinga (42mm), Mutare (29 mm), Mvurwi (22 mm), Chibhero (19 mm), Marondera (19 mm), Kanyemba (8 mm), both Karoi and Mount Darwin (6 mm each) and Hwange (5mm). By this morning, much of the sky had cleared as the atmosphere became less moist. Remnant moisture led to brief cloudy periods and isolated afternoon showers in the northern regions and some places in Matabeleland South province.

WEATHER OUTLOOK FOR: TUESDAY 10 DECEMBER 2024

Morning. Brief clouds in the southern and eastern parts of the country and the remaining areas should be under clear skies. All areas should be mild.

Afternoon: Expect briefly cloudy and warm conditions in

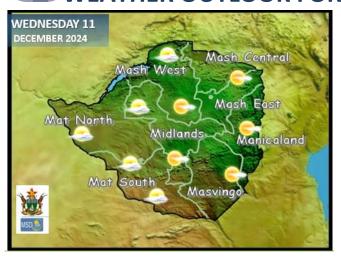

Manicaland, Masvingo and the Midlands

provinces with a chance of light showers that
may be thundery. The rest of the country should
be sunny and warm.

Overnight: Mostly clear skies and cool conditions in all areas. IMPACTS & ACTIONS TO TAKE:

- Stay hydrated, for better advice consult a doctor.
- Wear a sunhat or sunscreen if you need to be outdoors for an extended period.

WEATHER OUTLOOK FOR: WEDNESDAY 11 DECEMBER 2024

Morning. Partly cloudy and mild in Mashonaland West and all Matabeleland provinces. The rest of the country is expected to be under clear skies.

Afternoon: Anticipate mostly sunny and warm conditions over much of the country. For all Matabeleland provinces and Mashonaland West, it should be partly cloudy and warm with a chance of light showers.

Overnight: Clear skies and cool conditions.

IMPACTS & ACTIONS TO TAKE:

- Stay hydrated, for better advice consult a doctor.
- Wear a sunhat or sunscreen if you need to be outdoors for an extended period.
