

Weather Report & Forecast

SATELLITE-BASED GLANCE INTO THIS MORNING, **SUNDAY 16 FEBRUARY 2025**

Much of the country experienced scattered thunderstorms yesterday due to the current abundance of moisture in the atmosphere. Significant rainfall amounts were recorded in Agritex Nyamweda(70mm), Lusulu Tsetse Control(55mm), Mhondoro (55mm), Gwanda (47mm), Kotwa Ardas Mudzi(47mm), Chibero (40mm), Binga (38mm), Masvingo (36mm), Tsunga Seke Ward 17 (35mm), Parkison Secondary School Shurugwi(47mm), Lupane (28mm), Chisumbanje (27mm), and Matopos (21mm). Over the southern areas (Masvingo, and the southern parts of Manicaland provinces), light showers were experienced due to a cool, moist airflow. This morning, much of the country's western half was mostly cloudy, with mild morning conditions and isolated light rains and showers caused by moisture entering from Botswana. By the afternoon, much of the country was partly cloudy and warm, with scattered thundershowers in some areas.
