## SATELLITE-BASED GLANCE INTO THIS MORNING, FRIDAY 04 APRIL 2025

A slight pressure rise along the south-east coast of South Africa caused the advection of cool, moist south-easterly winds into the southern and eastern regions of the country. This resulted in isolated showers over **Manicaland, Masvingo, and Matabeleland South provinces**, with notable rainfall recorded in **Chipinge (39 mm), Chisengu (20 mm), Chisumbanje (9 mm), Zaka (8 mm), and Chiredzi (6 mm)**. In **Mashonaland Central and Harare Metropolitan** provinces, isolated showers occurred due to moisture influx from the north-east.

This morning, briefly cloudy and mild conditions persisted over **Matabeleland South, Masvingo, the Midlands, and Manicaland** provinces due to residual moisture. The rest of the country experienced clear skies and mild conditions. By the afternoon, mostly sunny and warm conditions prevailed in all areas.
