SUMMARY OF PAST WEEK: 23 OCTOBER – 29 OCTOBER 2025

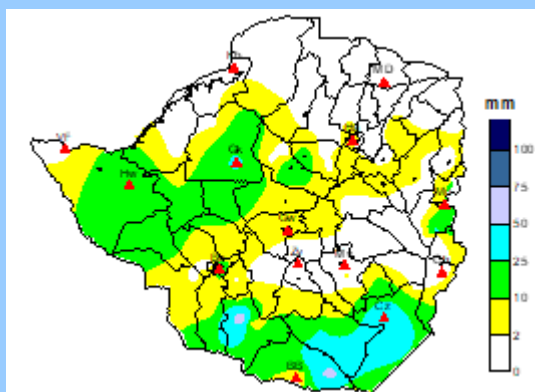

FIGURE 1: WEEKLY RAINFALL TOTALS: 23 -29 OCTOBER 2025

The week under review was predominantly wet, over the southern parts of the country, Matabeleland North, northern parts of Midlands and some parts of Manicaland Provinces receiving rainfall. However, all Mashonaland provinces and parts of Masvingo remained dry. The highest recorded precipitation ranged between 25mm and 50mm.

SEASONAL ACCUMULATED RAINFALL: 01 OCTOBER 2025– 29 OCTOBER 2025

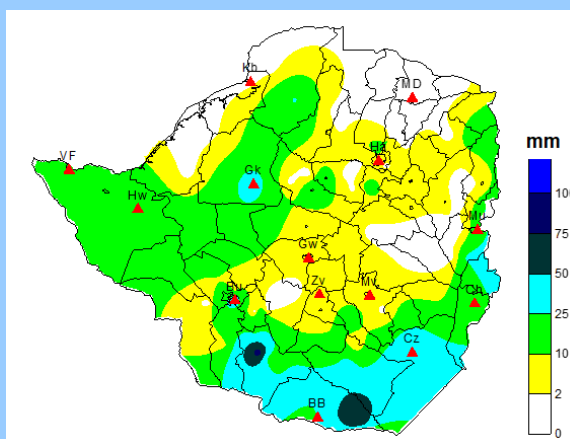

FIGURE 2: SEASONAL RAINFALL TOTALS: 01 OCTOBER -29 OCTOBER 2025

As illustrated in Figure 2, most of the country has recorded less than 25mm of rainfall. However, isolated areas in Matabeleland South province, received above 50mm between 01 October 2024 and present.

SEASONAL RAINFALL PERCENTAGE OF NORMAL: 1 OCTOBER 2025- 29 OCTOBER 2025

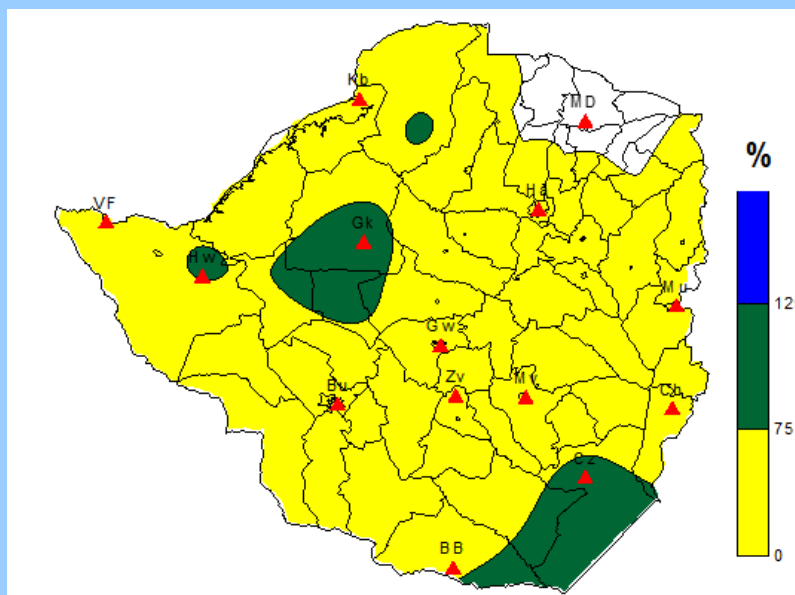

FIGURE 3: ACCUMULATION RAINFALL AS PERCENTAGE OF AVERAGE: 1 OCTOBER -29 OCTOBER 2025

Figure 3 shows that most of the country has received below-normal seasonal rainfall, represented by yellow shading. However, few patches in Masvingo, Matabeleland South, Matabeleland North, Midlands and Mashonaland West provinces recorded normal precipitation (indicated in green).

WEEKLY EVAPORATION 22 OCTOBER - 29 OCTOBER 2025

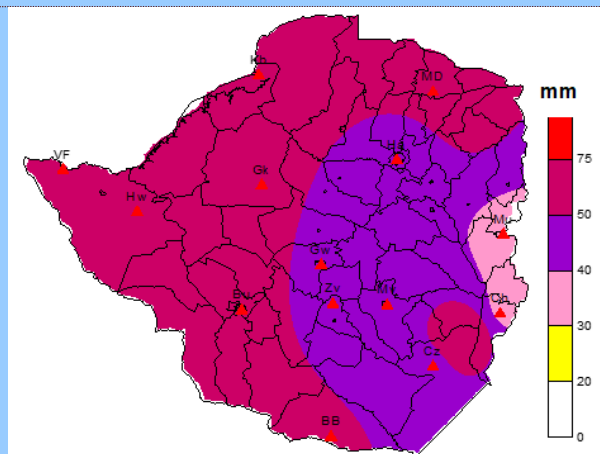

FIGURE 4: WEEKLY EVAPORATION: 22 -29 OCTOBER 2025

As shown in Figure 4, most parts of the country recorded higher evaporation rates (above 50mm), while the eastern parts of the country (Manicaland Province) experienced lower rates (below 40mm).

WEATHER OUTLOOK FOR THE PERIOD: 30 OCTOBER - 05 NOVEMBER 2025.

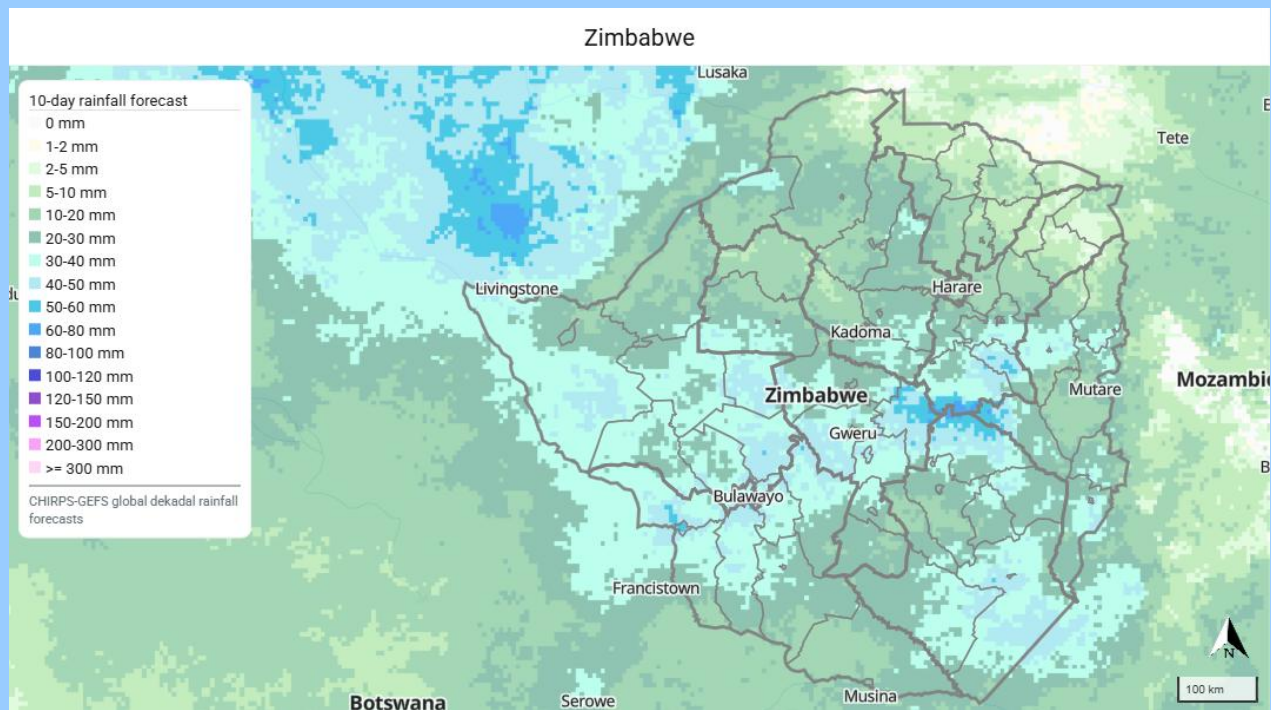

FIGURE 5: PRECIPITATION FORECAST: 30 OCTOBER – 05 NOVEMBER 2025

Figure 5 indicates that moisture influx from western regions of the country will trigger isolated thundershowers across all Matabeleland Provinces and central watershed of the country and southern parts of the country, in the coming week, with localized heavier falls possible. Meanwhile, the rest of the country remain mostly sunny and hot.
