

SATELLITE-BASED GLANCE INTO TODAY, SUNDAY 22 FEBRUARY 2026.

Out of the isolated thunderstorms that occurred along and to the north of the main watershed (Matabeleland North, Bulawayo Metropolitan, northern parts of the Midlands, Harare Metropolitan, Manicaland and all Mashonaland Provinces) the highest rainfall amounts were **35mm (Binga), 28mm (Rusape), 22mm (Victoria Falls), and 20mm (Rushinga).**

However, the moisture was pushed further northwards resulting in mostly cloudy and warm conditions in Matabeleland North, northern parts of the Midlands, Mashonaland West and Central Provinces. All other areas were mostly sunny and hot.

FORECAST FOR TOMORROW: MONDAY 23 FEBRUARY 2026

Northern parts of the Midlands, Matabeleland North and Mashonaland West

Mostly cloudy and warm in the afternoon with isolated thunderstorms along the Zambezi Valley. It should be mild both morning and evening.

Actions to Take:

- **Seek shelter in a safe building to avoid lightning strikes.**

Southern parts of Matabeleland North, Matabeleland South, Bulawayo and Harare Metropolitan, Midlands, Mashonaland East and Central, Masvingo and Manicaland provinces

Mostly sunny and hot in the afternoon, but mild both in the morning and the evening.

- **Keep hydrated**
- **Wear sunhats when outdoors for a long period of time**

WEATHER OUTLOOK FOR: TUESDAY 24 FEBRUARY 2026
